

STUDENT POSTER SESSION AND COMPETITION

Especially designed for students, this is a great opportunity to get industry input on student projects, as well as to gain exposure for students and programs conducting research in bioenergy and bioproducts.

The International Bioenergy and Bioproducts Conference (IBBC) invites abstract submissions for technical posters to be included in the IBBC Poster Session.

Posters addressing the following topics are welcomed:

- Supply and Demand of Woody and Nonwoody Biomass
 - Collecting, Harvesting and Preparation of Biomass
 - Torrefaction and Wood Pellets
 - Thermochemical and Biochemical Conversion Pathways
 - Production of High Value Biochemicals and Bioproducts from Biomass
 - Pilot Plant/Technology Demonstration -Case Studies
 - Techno-Economic and Life Cycle Assessments of Biorefinery Pathways
 - Policies & Initiatives for Advancing Biorefinery Projects
-

Submission Instructions

Students interested in presenting should upload their abstract to TAPPI's Speaker Management System, [eSelect](#), by **March 27, 2020**. Abstracts should be 1-2 paragraphs in length. Presenters will be notified of acceptance by April 29, 2020 and must provide a first draft of their presentation by September 7, 2020.

Conference Registration

Fees have not yet been set, but in 2019 student registration fees were \$95 for TAPPI student members, and \$130 for nonmembers (which includes a TAPPI student membership). It is expected for 2020 fees to be very similar to these rates. Please visit the IBBC website at www.tappi-ibbc.org for more details.

For more information on the event, submitting an abstract, or chairing a session, please contact: Lisa Stephens, TAPPI Account Manager, lstephens@tappi.org or Direct: 770-209-7313.

Visit www.tappi-ibbc.org to learn more about the conference and attendees.

RAPID FIRE SHOWCASE

Poster presenters are also invited to participate in IBBC's Rapid Fire Showcase.

The Rapid Fire Showcase gives you the opportunity to summarize the research you are working on. Attendees interested in subjects presented during the rapid-fire oral session can visit the accompanying poster and have a more in-depth discussion with the rapid-fire presenters during the student poster session and competition. This format offers greater exposure to presenters, as well as gives attendees a snapshot into the wide variety of research being conducted in the biorefinery arena.

Your power point presentation should have only 5 slides:

- **Slide 1 - Title slide:** Title of presentation, your name and your institution/group that you represent.
- **Slide 2 - Description of the work:** Description of the work you have done (raw material, equipment used, process conditions used).
- **Slide 3 and 4 - Results:** Graphs and tables that will show the results from the work. Please do not load too much graphs or table so we cannot see the numbers. It would be better here to have less and see more.
- **Slide 5 - Conclusions:** 3 to 4 bullet points that describes the conclusions that you made from the experiment you conducted.

For more information on the event or submitting an abstract, please contact: Lisa Stephens, TAPPI Account Manager, lstephens@tappi.org or Direct: 770-209-7313.
